CAREER OBJECTIVE

My goal in cybersecurity is to fortify digital environments against threats and vulnerabilities. I aspire to apply my technical skills, knowledge, and determination to protect data and systems, maintain compliance, and provide rapid response to security incidents. I am dedicated to evolving alongside the dynamic cybersecurity landscape and continuously enhancing security measures to ensure organizational resilience.

WORK EXPERIENCE

Penough Ltd., Bangladesh

November 2023 – Present

Security Software Engineer

- Developing and securing software applications by implementing secure coding practices.
- Conducting vulnerability assessments, code reviews, and penetration testing for applications and systems.
- Automating security processes for continuous monitoring and threat detection.
- Collaborating with developers to integrate security into the SDLC (Software Development Life Cycle).

FSN Solutions Ltd., Uttara, Dhaka

March 2023 – October 2023

Junior Cyber Security Engineer (SOC)

- Monitoring security alerts and investigating suspicious activities.
- Performing threat analysis, incident response, and log analysis to detect and mitigate cyber threats.
- Generating security reports and advising on risk mitigation strategies.
- Managing security tools and ensuring compliance with industry security policies.
- Conducting basic forensics for cyber incident investigations.

EDUCATION

Independent University

2018 – 2024

BSc in Computer Science & Engineering

Dhaka, Bangladesh

CGPA: 3.22

CERTIFICATIONS

- **ISO/IEC 27001:2022 Lead Auditor** – Mastermind Assurance (May 2025)
- **CASA – Certified API Security Analyst** – APISEC University (Apr 2025)
- **ACP – APISEC Certified Practitioner** – APISEC University (Apr 2025)
- **CAP – Certified AppSec Practitioner** – The SecOps Group (Sep 2024)
- **Certified Cyber Security Analyst (C3SA)** – CyberWarFare Labs (July 2024)
- **Certified Network Security Practitioner (CNSP)** – The SecOps Group (June 2024)

TECHNICAL SKILLS

- **Security Operations:** Wazuh, Shuffle, Cortex, Hive, OpenCTI.
- **Threat Intelligence:** MITRE ATT&CK, YARA rules, Sigma rules.
- **Security Monitoring:** SIEM, IDS/IPS.
- **Pen-Testing & Forensics:** Burp Suite, Metasploit, Nmap, Nessus, Nikto, Basic Forensics, Reverse Engineering.
- **Development:** JavaScript, Node.js, React.js, Tailwind CSS, HTML/CSS.
- **Security Practices:** JWT, OAuth, Input validation, Security headers, AES/RSA/SHA encryption.
- **Testing Tools:** Postman, Apache JMeter.

ACHIEVEMENTS

- Developed a SOC monitoring system integrating Wazuh, Shuffle, Cortex, and OpenCTI.
- Led a web application security project identifying and remediating OWASP Top 10 vulnerabilities.
- Developed a full-stack web application with secure authentication mechanisms using React, Node.js, and MongoDB.

PERSONAL PROFILE

- **Languages:** Bangla (Native), English (Full Professional).
- **Interests:** DevSecOps, Cloud Security, Ethical Hacking, Cybersecurity Research.
