PROFESSIONAL SUMMARY

Cybersecurity product engineer and SecDev Lead with experience in security software development, application security, defensive security, and cybersecurity automation. Co-developing security platforms spanning phishing simulation, continuous penetration testing, vulnerability lifecycle management, and security-focused internet asset discovery. Experienced in building web applications, REST APIs, authentication systems, and security workflows using modern JavaScript and Python technologies. Interested in Application Security, DevSecOps, Security Engineering, and cybersecurity research, with a focus on building practical security products that improve organizational cyber resilience.

WORK EXPERIENCE

Penough Ltd., Bangladesh November 2023 – Present
SecDev Lead

- Lead the development of cybersecurity products, translating security requirements into practical software features and workflows.
- Design and develop security-focused web applications, backend services, REST APIs, authentication mechanisms, and vulnerability management workflows.
- Drive development across three cybersecurity products: PhishTop, BugValluk, and Surveiller.io.
- Apply secure software development practices, including authentication and authorization controls, API security, vulnerability validation, and secure coding principles.
- Develop automation for security assessment, vulnerability tracking, remediation workflows, and security reporting.
- Collaborate with security researchers and software engineers to improve product functionality, security, and maintainability.
- Contribute to application security testing, security issue remediation, and the integration of security practices throughout the software development lifecycle.

SELECTED CYBERSECURITY PRODUCTS

PhishTop – Security Awareness & Phishing Simulation Platform
Website: phishtop.com

- Developing a security awareness and phishing simulation platform designed to help organizations assess user awareness and strengthen their human security defenses.
- Product scope includes simulation workflows for email, QR codes, calendar invitations, and public-event-themed scenarios.
- Focus on campaign management, simulation workflows, and security awareness assessment.

BugValluk – Continuous Penetration Testing & PenOps Platform
Website: bugvalluk.com

- Lead development of a continuous penetration testing platform designed to streamline security assessments and vulnerability lifecycle management.
- Develop workflows for real-time vulnerability reporting, evidence management, risk prioritization, remediation tracking, and retesting.
- Contribute to platform features supporting collaboration between security researchers and engineering teams, including centralized dashboards and vulnerability status tracking.
- Support end-to-end PenOps workflows, connecting assessment scoping, vulnerability discovery, remediation, verification, and security reporting.

Surveiller.io – Security Search & Internet Asset Discovery
Website: surveiller.io

- Developing a security-focused search platform to help users explore internet-facing services and discover security-relevant information about exposed assets.
- Working across a React-based frontend, Node.js/Express backend, authentication workflows, and API-driven search functionality.

- Contributing to search interface development, backend integration, data presentation, and platform functionality for security-focused discovery and research.

PREVIOUS EXPERIENCE

FSN Solutions Ltd., Uttara, Dhaka March 2023 – October 2023
Junior Cyber Security Engineer (SOC)

- Monitored SIEM alerts and investigated potential security incidents.
- Performed log analysis, threat investigation, and incident response activities to identify suspicious behavior.
- Conducted vulnerability assessments and prepared security assessment reports.
- Supported security monitoring operations, security tool management, and compliance-related activities.
- Assisted with digital forensic investigations and malware analysis.

TECHNICAL SKILLS

Application Security: Secure Coding, Secure Code Review, Threat Modeling, Authentication & Authorization, API Security, Vulnerability Assessment.

Defensive Security: SIEM, Security Monitoring, Threat Detection, Incident Response, Log Analysis, Vulnerability Management, Digital Forensics.

Security Platforms: Wazuh, TheHive, Cortex, Shuffle, OpenCTI.

Threat Intelligence: MITRE ATT&CK, YARA Rules, IOC Analysis.

Programming Languages: JavaScript, TypeScript.

Frontend Development: React.js, Next.js, HTML5, CSS3, Tailwind CSS.

Backend Development: Node.js, Express.js, REST APIs, JWT, OAuth2.

Databases & Search: PostgreSQL, MongoDB, Elasticsearch.

DevSecOps & Infrastructure: Git, GitHub, Docker, Linux, Secure SDLC, CI/CD Fundamentals.

Testing & API Tools: Postman, Apache JMeter.

EDUCATION

Independent University, Bangladesh 2018 – 2024
Bachelor of Science in Computer Science & Engineering
CGPA: 3.03/4.00

CERTIFICATIONS

- **ISO/IEC 27001:2022 Lead Auditor** – Mastermind Assurance, May 2025
- **CASA – Certified API Security Analyst** – APISEC University, April 2025
- **ACP – APISEC Certified Practitioner** – APISEC University, April 2025
- **CAP – Certified AppSec Practitioner** – The SecOps Group, September 2024
- **Certified Cyber Security Analyst (C3SA)** – CyberWarFare Labs, July 2024
- **Certified Network Security Practitioner (CNSP)** – The SecOps Group, June 2024

PROFESSIONAL INTERESTS

- Cybersecurity product engineering and security research.
- Application Security, DevSecOps, and secure software design.
- Defensive security, threat detection, and digital forensics.
- Vulnerability discovery, continuous security testing, and security automation.

ADDITIONAL INFORMATION

Languages: Bangla (Native), English (Professional Working Proficiency).
